✓ Efficient Waterproofing ✓ Superior Performance

Organic cotton, wool, or linen that is processed without harsh chemicals.

6 Core Highlights Reasons for choosing us

Colorless
Transparent

Operation
Simple

One Brush
Stop Leakage

Durable Acid - Base

Green Environment
Protection

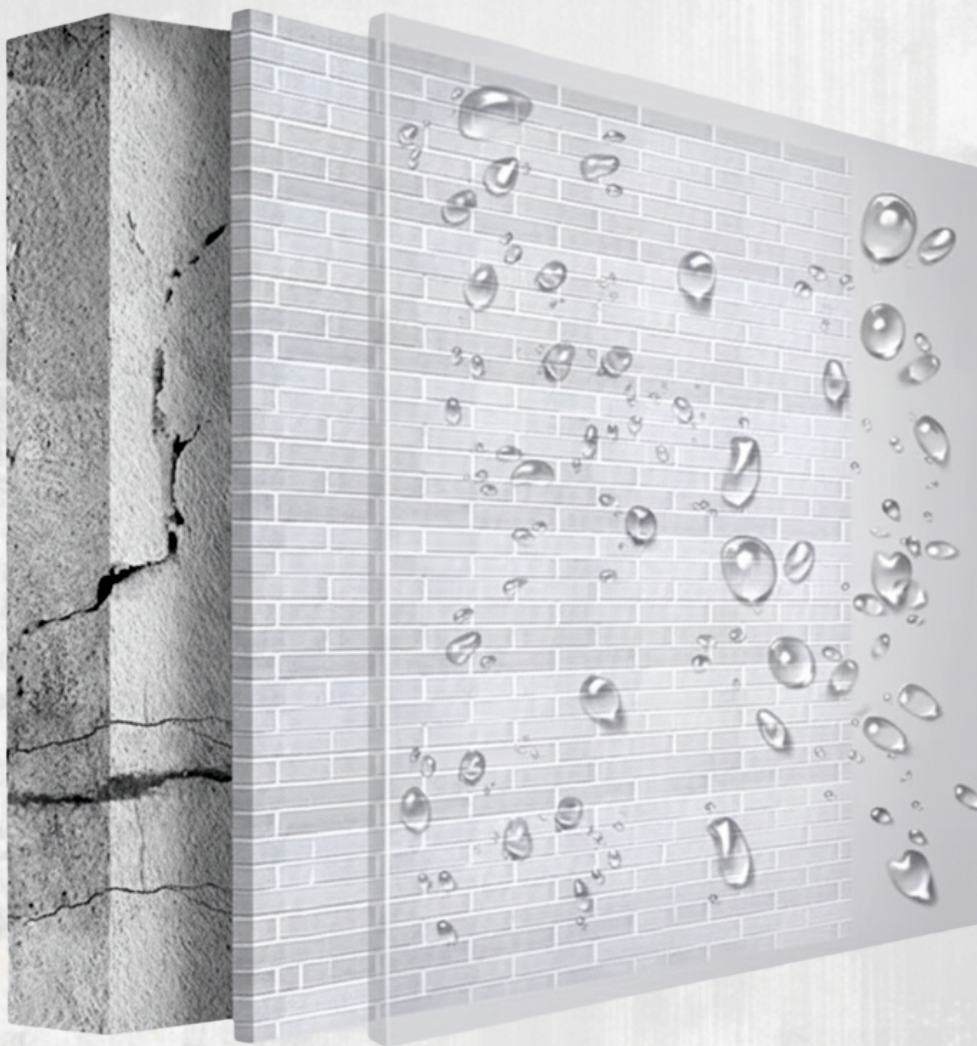

Film Forming
Stable

Do not change the color of walls or tiles not affecting aesthetics

High temperature resistance, Anti freezing,
Anti yel-losing & No peeling

Concrete the
basic level

Exterior wall
surface

Transparent
Waterproof layer

Do You also have the following troubles ?

Say goodbye to repeated water leaks, Start with
UV Shield Pro

Invite someone to expensive

Wall Seepage Crack

Water Leakage Moldy & Peeling

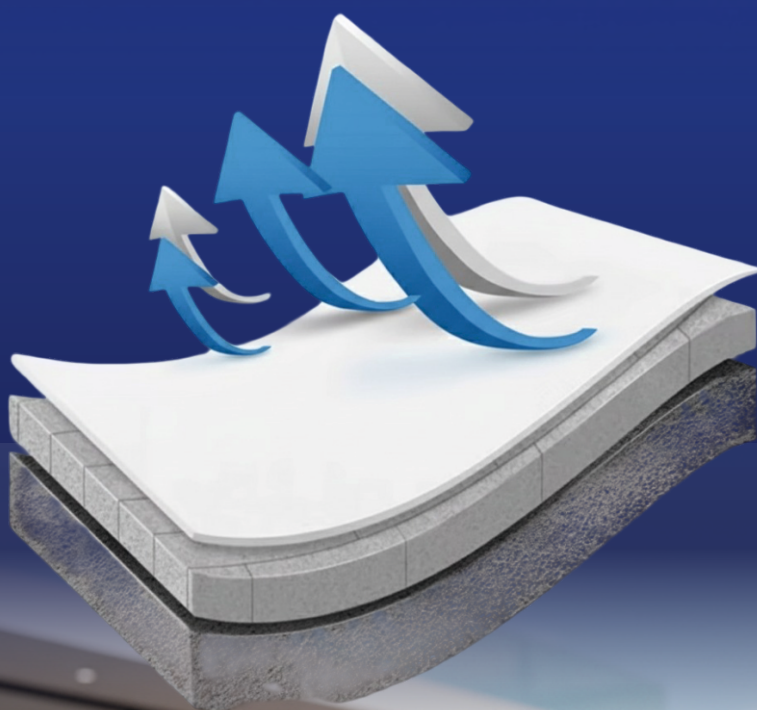

Windowsill Repeated Water Seepage

Strong UV Resistance Not afraid of sunlight and aging

After curing, it forms a dense and tough elastic waterproof membrane with a longer service life.

The Base Level

Exterior Wall Surface

UV Resistant Waterproof Layer

Brush in the morning & use in the afternoon faster waterproofing

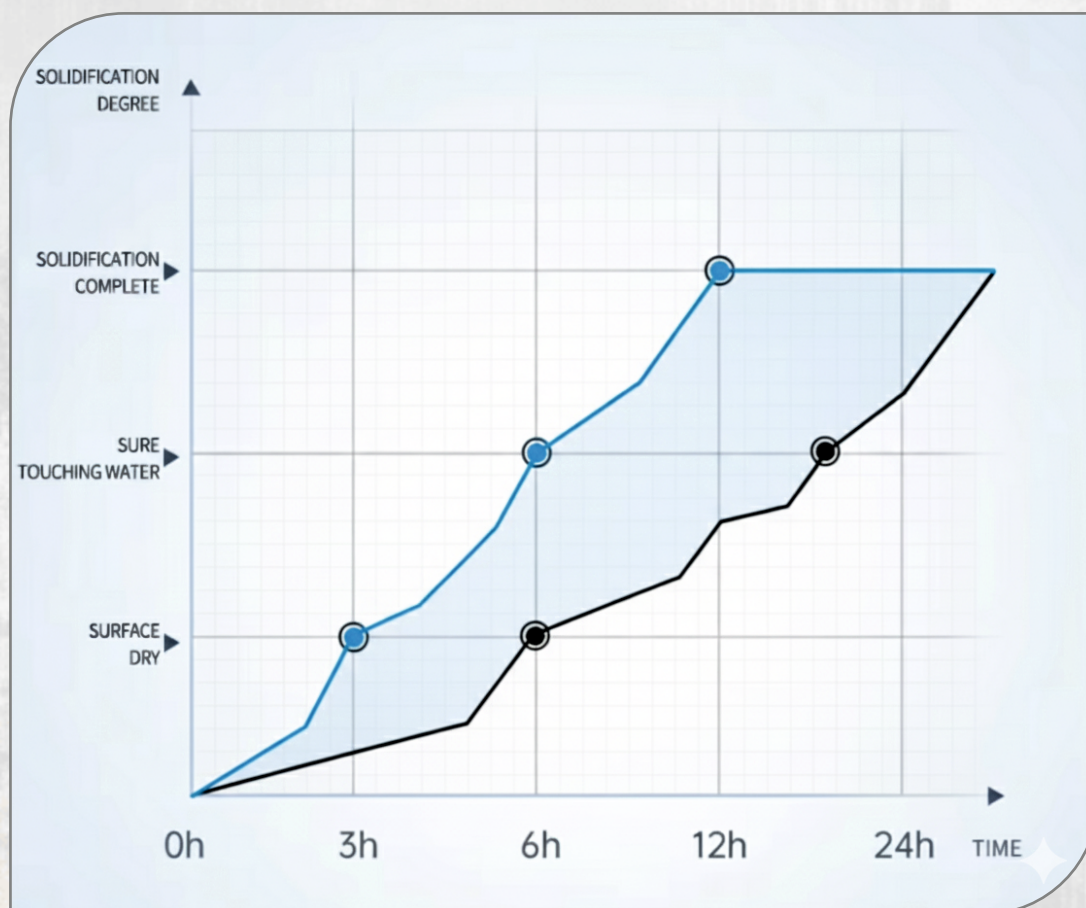

Using special polymer copolymers as the base material,
Greatly reducing labor costs

3h

3H QUICK DRYING

6h

6H ENCOUNTER WITH WATER

UV SHIELD PRO

OTHER BRANDS

Transparent waterproof adhesive

Kind Reminder:

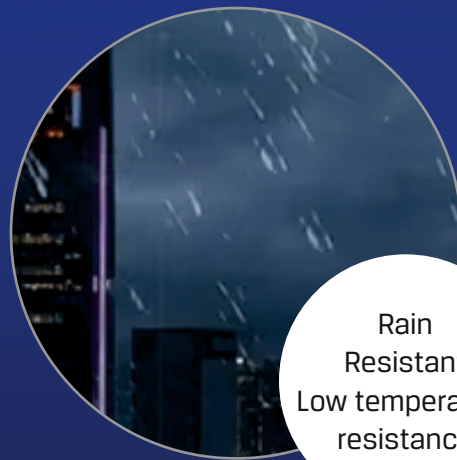

Due to the humidity and temperature of the construction environment, there may be difference during drying, please refer to the actual drying time for accuracy.

High temperature does not soften Low temperature non cracking

Weather it's a cold storm in the north or a scorching heat in the south, they can handle it calmly

High
Temperature
Resistance
sun resistant

Rain
Resistant
Low temperature
resistance

The paper towel coated with waterproof adhesive can withstand high temperature baking without melting

A tissue coated with waterproof adhesive that can withstand freezing below zero without cracking

Product Parameter

Product information description

UV Shield Pro Transparent Waterproof Adhesive

PRODUCT SPECIFICATION

1 KG and 5 KG

PRODUCT CHARACTERISTIC

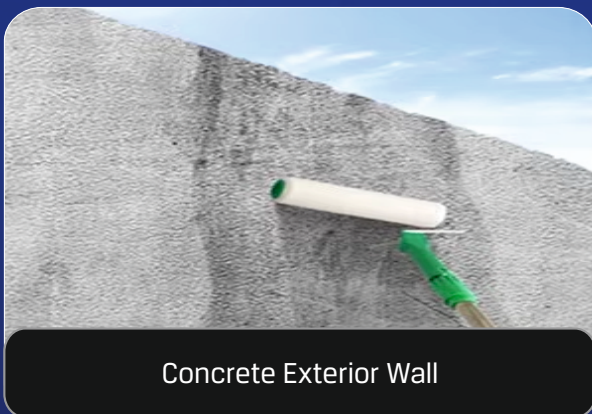

Colorless And Transparent, Easy To Operate, One Brush Leak Proof, Stable Film Formation, Acid And Alkali Resistance, Green And Environmentally Friendly

SCOPE OF APPLICATION

External Walls, Window Sills, Brick Gaps, Etc.

Widely Applicable

Transparent and invisible, brush where there is leakage Transparent and trace less after drying, making it an invisible rain coat for walls

Concrete Exterior Wall

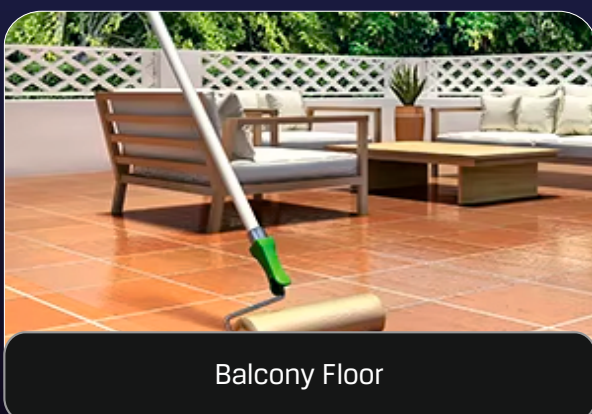

Ceramic Tile Exterior Wall

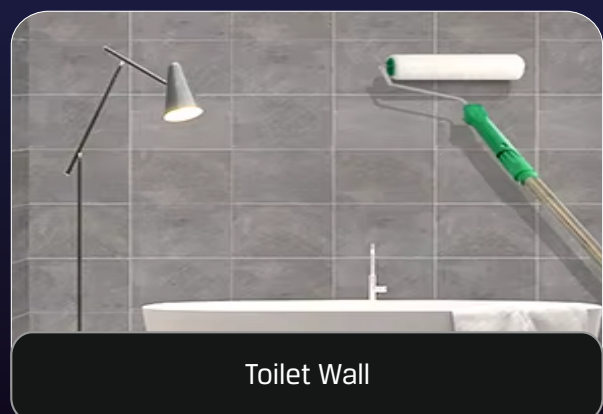

Stone Exterior Wall

Minor Cracks on the wall waterproof

Balcony Floor

Toilet Wall

- Transparent after drying...

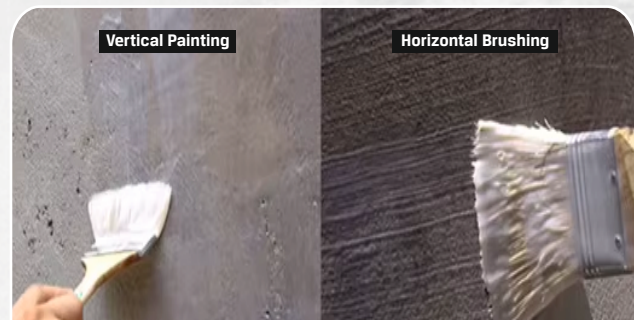

Construction Process

Simple 3 Step construction easily waterproof and repaid leaks

1 GRASSROOTS TREATMENT

The base surface must be flat, dry, free of oil stains, dust and unevenness cracked areas should be filled with gaps before construction, for large gaps. They should be sealed with water before painting.

2 PAINTING

Apply two to three coats, as evenly as possible, with each coat perpendicular to the direction of the previous coat. the next process can only proceed after each coat of film is completely dry. The joints and minor cracks in the wall tiles must be painted longitudinally along the direction of the fine joints (or brick joints), and the base surface should be painted horizontally after the coating film is dry.

3 POST COATING TREATMENT

Maintain ventilation and prohibit stepping on or getting into water. After the coating is completely dry, conduct a water spraying experiment and acceptance.
